EDUCATION

Bangalore Institute of Technology, Bangalore

2023 – 2027

B.E. - Electronics and Communication Engineering — CGPA (till 5th Sem): 8.5 Bangalore, Karnataka

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, SQL

Technologies/Frameworks: FastAPI, Node.js, Express, React, Next.js, PostgreSQL, MongoDB, Docker, Pinecone, LangChain, LangGraph

Architecture & AI: REST API, RAG Pipelines, Agentic AI, Explainable AI (SHAP), LLM Orchestration

Tools & Workflows: Git, GitHub/GitLab, CI/CD (GitHub Actions), Linux, Postman, Agile Methodologies, Unit Testing

Core Coursework & Concepts: Data Structures, Operating Systems, OOP Concepts, Computer Networks, DBMS, System Design (HLD & LLD), Load Balancing, Rate Limiting

PROJECTS / EXPERIENCE

SRE Triage Environment 🔗 | [FastAPI](#), [Python](#), [LiteLLM](#), [Pydantic](#), [Docker](#)

March 2026

- Engineered a production-grade, deterministic simulation environment to benchmark autonomous AI agents on complex DevOps tasks, successfully scaling to process thousands of simulated system logs.
- Integrated LiteLLM for multi-model evaluation (GPT-4o, Claude 3.5, Gemini), enforcing strict, type-safe API contracts using Pydantic Structured Outputs to eliminate JSON parsing errors.
- Architected a state-machine engine decoupled from the FastAPI backend, utilizing Docker to enable 100% reproducible evaluations of agentic workflows and service recoveries.

PolicyMind: Cloud-First RAG API 🔗 | [FastAPI](#), [Python](#), [Pinecone](#), [Gemini API](#)

August 2025

- Built a production-ready Retrieval-Augmented Generation (RAG) API for document intelligence, reducing unstructured data querying latency through multi-format ingestion and Tesseract OCR fallback.
- Developed an asynchronous LLM orchestration pipeline integrating Gemini/OpenAI, deployed on a Linux server leveraging Pinecone for native semantic indexing and rapid vector retrieval across thousands of document chunks.
- Implemented a resilient query engine featuring strict dependency injection, Pydantic validation, and exponential-backoff retry logic to maintain 99% uptime during LLM rate limits.

Real Estate Platform 🔗 | [React](#), [Node.js](#), [Express](#), [MongoDB](#), [Socket.io](#), [Prisma](#)

April 2025

- Engineered a full-stack real estate web application utilizing React and Node.js, featuring interactive Leaflet maps and advanced multi-criteria search algorithms capable of filtering 1,000+ property listings with sub-second latency.
- Architected an event-driven bidirectional chat system using Socket.IO for real-time buyer-agent communication, managing persistent data streams via Prisma ORM to support 100+ concurrent active connections.
- Implemented robust security protocols including stateless JWT authentication, bcrypt password hashing, and enterprise-grade middleware to prevent XSS, CSRF, and integer overflow attacks, validating system stability through rigorous Unit Testing within an Agile development cycle.

ACHIEVEMENTS

- **Top-Tier Competitive Programmer:** Achieved **LeetCode Knight** (Max Rating 1879), **Codeforces Specialist** (Max Rating 1581), and **CodeChef 3-Star** (Max Rating 1679), solving **1000+** algorithmic problems across all platforms. 
- **Google 'The Big Code' (2026):** Secured a position in the **Top 1,500 nationally**, advancing through multiple rigorous algorithmic elimination rounds out of tens of thousands of engineering students across India.
- **TCS CodeVita:** Achieved a **Global Rank under 1000** in Round 2 of the world's largest competitive programming contest, successfully advancing past tens of thousands of competitors in the initial stage.
- **Meta Hacker Cup 2025: Qualified for Round 2** of the global competition, securing a Round 1 Rank of **669** and a Round 2 Rank of **1160**. 
- **Global Coding Rankings:** Secured **Global Rank 110** in CodeChef Starters 187 and **Global Rank 586** in Educational Codeforces Round 183.
- **Corporate Hackathon Recognition:** Shortlisted for the Adobe India Hackathon (2025) and HackOn With Amazon Season 5 following rigorous online coding assessments. 

EXTRACURRICULAR

- Conducted offline C++ and DSA sessions for juniors, focusing on recursion and graph. *March 2025*
- Active NSS Member (2022 – 2023); contributed to community outreach, cleanliness drives, and digital literacy camps.
- Participated in multiple college-level hackathons and coding competitions.
